## Strong rebound in production in H2, reaching an all-time high

Voltaia (Euronext Paris, ISIN code: FR0011995588), an international player in renewable energies, publishes today its FY 2018 preliminary power production data.

*"To joyfully start this new year, I am glad to share that we have set a new high in the second semester of 2018, with production reaching 1.28 TWh, up by 59% compared with the first semester. This performance was driven by good wind conditions in Brazil and high availability rates globally, thanks to our effective operation and maintenance program. These record production levels support our outlook for an overall strong second half of 2018 and allow us to start 2019 full of confidence: records are made to be broken!"* comments Sébastien Clerc, Chief Executive Officer of Voltaia.

### Preliminary production data by semester

in GWh	H2 2018	H1 2018	H2/H1 Var.
Brazil	1,191	722	+65%
France	57	56	+1%
French Guiana	21	19	+12%
Rest of the world	8	8	+0%
<b>Total</b>	<b>1,277</b>	<b>804</b>	<b>+59%</b>

### Comments on H2 electricity production

- Brazil: excellent overall performance in the second half of 2018, with good wind conditions and availability rates resulting in a 65% increase in production compared with the first half of 2018;
- Metropolitan France: new solar plants commissioned in the second half offset seasonality effect and mixed climate conditions;
- French Guiana: the Mana hydro plant drove the good performance.

### Confirmed short-term outlook

Continuing the Q3 2018 momentum and based on positive trends announced in the H1 results communication, Voltaia confirms the short-term outlook of a materially higher profitability in H2 compared with H1.

## Preliminary report on electricity production

Total production by area and by energy in GWh	Wind	Solar	Biomass	Hydro	Hybrid	Total FY 2018
Brazil	1,873.1				40.2	1,913.4
France	93.0	19.9				112.9
French Guiana		4.6	10.6	24.1		39.3
United Kingdom		7.8				7.8
Greece		6.9				6.9
Portugal		1.2				1.2
<b>Total</b>	<b>1,966.1</b>	<b>40.4</b>	<b>10.6</b>	<b>24.1</b>	<b>40.2</b>	<b>2,081.4</b>

Installed capacity by area and by energy In MW	Wind	Solar	Biomass	Hydro	Hybrid	As of 12/31/2018
Brazil	417.3				16.0	433.3
France	42.2	23.7				65.9
French Guiana		4.5	1.7	5.4		11.6
United Kingdom		7.3				7.3
Greece		4.7				4.7
Portugal		1.0				1.0
<b>Total</b>	<b>459.5</b>	<b>41.2</b>	<b>1.7</b>	<b>5.4</b>	<b>16.0</b>	<b>523.8</b>

## Next on the agenda: Q4 2018 revenues on January 23, 2019

### About Votalia ([www.votalia.com](http://www.votalia.com))

- Votalia is an international player in the renewable energy sector. The Company produces and sells electricity generated from wind, solar, hydro and biomass power plants; it owns a total installed capacity of 524 MW as of today.
- Votalia is also a service provider, assisting its investor clients active in renewables at each project stages, from conception to operation and maintenance.
- With 490 employees in 18 countries over 4 continents, Votalia is able to act worldwide on behalf of its clients.
- Votalia has been listed on the Euronext regulated market in Paris since July 2014 (FR0011995588 – VL TSA) and is a component stock of the Euronext Tech 40 index and the CAC Mid&Small index. The Group is also included in the Gaïa-Index, an index for socially responsible midcaps.
